PW Gates is an independent distribution company which offers a personal and dependable service to customers nationwide.

Established in 1976, the company has kept abreast of the changes that have transformed this sector in recent years whilst maintaining a sharp focus on the individual needs of all its customers.

Many of these have enjoyed the benefits of PW Gates' finely tuned and cost effective range of logistical services for more than a decade.

PW Gates is based in Hertfordshire, where it has ample storage facilities and a dedicated warehouse team, and easy access to north/south and east/west motorway routes.

Goods arrive here from all over the world and are palletised, stored and distributed as and when the customer requires. This seamless service can also include completing necessary paperwork and labelling goods.

Flexibility and reliability are key to the success of PW Gates. Last minute deliveries are undertaken as part of the service and the company has a success rate of 99.8% for getting goods to their destination on time.

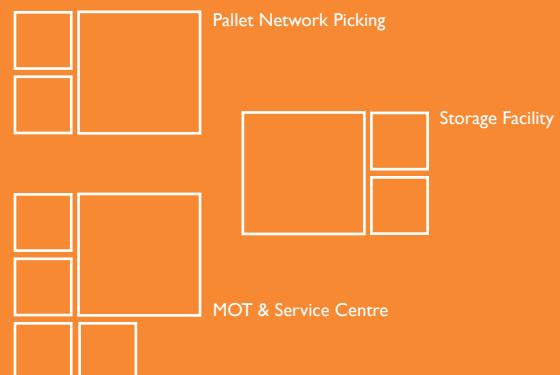

As a member of The Pallet Network, PW Gates has access to hundreds of vehicles throughout the country, in addition to its own well maintained fleet.

This means a guaranteed next day delivery virtually anywhere in mainland Britain, at a fraction of the cost that would be incurred using a traditional haulage service.

Computer software has helped make the operation even more efficient. For example, the warehouse has a computerised stock control system; the warehouse and distribution operations are computer linked; and all the company's vehicles are fitted with satellite tracking systems.

A further addition to the range of services is an MOT, repairs and service centre dedicated to Class 4 and Class 7 vehicles. This is run by fully trained technicians and is equipped with computerised diagnostic equipment.

chris@pwgates.co.uk

The bulk of this operation involves palletising goods that arrive in containers and trailers, mostly from overseas, and storing them prior to distribution to centres throughout the UK.

PW Gates is well placed to operate as a logistics centre for companies importing goods from overseas, particularly the Far East.

Our modern warehousing facility offers:

LONG OR SHORT TERM

BLOCK STACK OR RACKED

CONTAINER DE-STUFFING

REPALLETISING

PICK AND PACK OPERATION

BREAK BULK FOR ONWARD DELIVERY

CROSS DOCKING FACILITY

All our drivers are directly employed by PW Gates and many of them have worked for the company for many years, helping us to establish long and successful relationships with our customers.

In addition, we have an extensive fleet of expertly maintained vehicles, all of which are equipped with tail lifts and satellite tracking, so that we can keep customers updated on the progress of their deliveries.
